

## IRONCAD™ Virtual Training

Because of its effectiveness, and ease of use, our IronCAD™ Virtual Training solutions are implemented by many companies to train their staff and to meet their objectives. These companies and others also enjoy the cost saving benefits of our virtual training environments.

### Virtual Classroom

Today companies depend on highly skilled and well-trained employees. Magnacad's virtual classrooms adds a new alternative to education by eliminating all the wasteful costs traditionally associated with sending staff to off-site training providers.

Participants experience a new level of engagement in a visually appealing and interactive on-line environment. Because employees can study live with an on-line instructor, or when it fits their schedule, the result is a more confident and highly skilled workforce.

### Great Learning Experience; Focused

Our virtual classrooms offer the easiest way to on-line training possible. Students learn within a few minutes of their first session how to navigate the controls. Students can focus on learning and not the burden of traveling, forgetting materials, being late and missing lectures. Virtual classrooms are primarily focused around the students.

### Rich Interaction Tools

Virtual classrooms are powered by our own JRIV partner Mikogo™ which provides a rich set of educational tools for enhanced student engagement. Such key features include: Whiteboard, Chat, 200MB File Transfer, Remote controls, Multiple Languages, Switch Presenter, Audio Conferencing, and Session Recording.

#### How you Benefit

- Increased productivity
- Higher training effectiveness
- Reduced cost per employee
- Higher attendee satisfaction
- Instructor led or self paced
- Reduced or zero travel time
- Consistent content

### Investment Costs

The Virtual classroom sessions are primarily provided in hourly increments thus allowing the student to reduce their costs even further. Structured sessions are delivered to larger groups and are based on a daily rate.

**Hourly Rate:** USD\$85.00/Hr. per participant

**Daily Rate:** USD\$495.00/8-Hr. per participant

\*Implement VC sessions through our Night Owl program and save 20% off standard rates. [www.magnacad.com/Training/Night\\_Owl.pdf](http://www.magnacad.com/Training/Night_Owl.pdf)

Magnacad Design Inc. has a 20-year history of providing Engineering and Manufacturing Software Solutions whose customers have benefited extensively from our expertise, training, and support when choosing a PLM component solution.
